CC-SF feature-selection diagnostic | width 125 mm, prediction stage 10
CC-SF, seed 3
CC-SF, seed 6
Nominal margin
QP affine margin
Margin [mm]
Distance ϕ
Projected risk ρ
Distance / risk [mm]
Feature selector changed
Cycle change $\Delta\rho$ [mm]
Current progress s [m]
Raw 0.1 s samples; vertical lines mark reconstructed selector changes.
Pose and covariance vary between samples: these are not isolated boundary jumps.
